Who we are: CAHN Background

CAHN's Vision & Mission

CAHN is a Black-led organisation set up to address the wider social determinants and reduce health disparities for people of Caribbean & African in Greater Manchester and beyond. We work with the Black community and cross-sector organisations to build community resilience, relationships, and a social movement to reduce health inequalities.

CAHN's vision is to end health inequalities and wider disparities for Caribbean and African people in a generation.

Our mission is to ensure that the strategic and operational actions of service providers across health and cross sector agencies and commissioners, lead to racial and social justice for Black people.

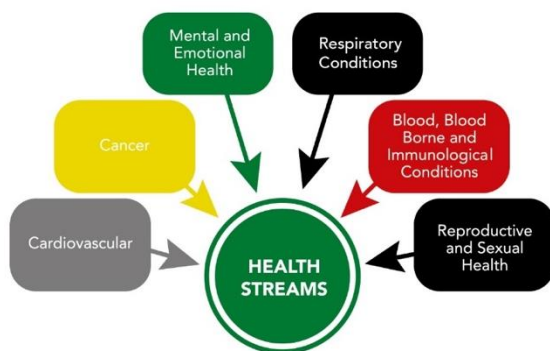

CAHN is working to achieve the Organisational objectives by delivering Health & Wellbeing programmes across six priority health conditions: Cardiovascular, Respiratory, Cancer, Mental Health, Immunology, and Reproductive & Sexual Health.

We provide regular community engagement activities to reduce the wider determinants that influence poor health outcomes. In addition, we strive for change by providing tailored health training for community members, cultural competency, and anti-racist training plus allyship and inclusive leadership programmes.

We effect change using a partnership approach with our stakeholders. Our reach into our communities enable us to gather the evidence base that influence, policy, research, and practice decision making.

We have an operational arm within CAHN that responds to the needs of our communities in a racially, religiously, and culturally sensitive way. Some of our current services include our Black-led counselling service dealing with low level mental health issues, bereavement, and domestic violence. Some of other services include our family, advocacy, and health education services.

Our Health Priorities

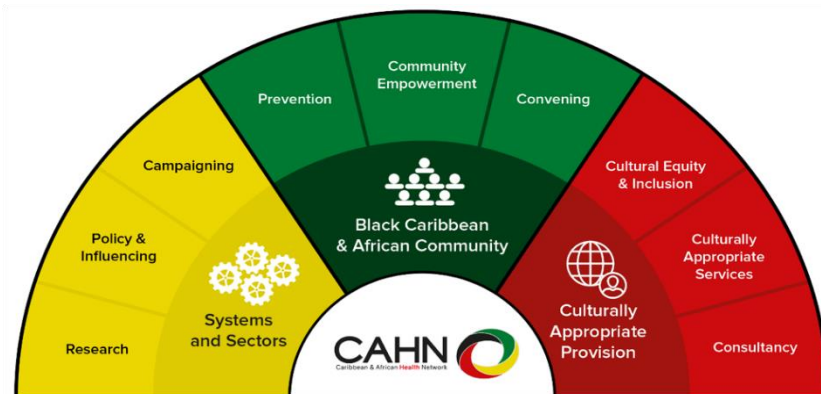

The evidence base identifies six key areas of work that we need to work with our community and stakeholders to address. Within all these health prevention and intervention programmes there is a requirement to work with our communities to ensure that the action taken is tailored to meet our distinct needs.

CAHN's health programmes take in account intersectionality within the protected characteristics to deliver impact across generational groups.

A lot of our work is undertaken in partnership with Trusts, commissioning bodies, local authorities, faith communities, voluntary and private sector organisations and others including universities. This work seeks to enable a better experience and outcome for people of Caribbean or African descent locally and national.
